

International Concurrent Workshop Basic 2

SLE and autoimmunity

Day 1 April 21, 10:20 - 11:20 Room 5

Chair: Kimito Kawahata

Department of Rheumatology, Graduate School of Medical and Dental Sciences, Tokyo Medical and Dental University, Japan

ICW-B2-1 Effect of anti-high mobility group box 1 antibody for nephritis in MRL/*lpr* lupus-prone mice

Haruki Watanabe

Department of Nephrology, Rheumatology, Endocrinology and Metabolism, Okayama University Graduate School of Medicine, Dentistry and Pharmaceutical Sciences, Okayama, Japan

ICW-B2-2 The CD4⁺CD52^{low} T cell Contributes to Disease Activity and Autoantibody Production in Systemic Lupus Erythematosus

Masataka Umeda

Unit of Translational Medicine, Department of Immunology and Rheumatology, Nagasaki University Graduate School of Biomedical Sciences, Nagasaki, Japan

ICW-B2-3 miR-200a-3p regulates IL-2 production in SLE derived T cell by targeting C-terminal binding protein-2 (CtBP2)

Eri Katsuyama

Department of Nephrology, Rheumatology, Endocrinology and Metabolism, Okayama University Graduate School of Medicine, Dentistry and Pharmaceutical Sciences, Okayama, Japan

ICW-B2-4 Decreased frequency and activated phenotype of blood CD27+IgG+B lymphocytes in systemic lupus erythematosus patients

Zhen Chen

Rheumatism Department, Second Affiliated Hospital and Second Clinical Medical College of Fujian Medical University, Quanzhou, Fujian, China

ICW-B2-5 Characteristic expression of chemokine receptor and its relevance to differentiation of B cells in patients with systemic lupus erythematosus (SLE)

Maiko Yoshikawa

The First Department of Internal Medicine, University of Occupational and Environmental Health, Japan

ICW-B2-6 Anti-Suprabasin Antibody: Identification of a Novel Antibody for Neuropsychiatric Systemic Lupus Erythematosus

Kunihiro Ichinose

Department of Immunology and Rheumatology, Nagasaki University Graduate School of Biomedical Sciences, Japan
