

International Concurrent Workshop Basic 5

RA and immunology

Day 2 April 22, 10:20 - 11:20 Room 5

Chair: Zhan-Guo Li

Department of Rheumatology and Immunology, People's Hospital, Beijing University Medical School, China

ICW-B5-1 Involvement of M2 Macrophages in the Pathogenesis of Arthritis in a Mouse Model

Shinjiro Kaieda

Department of Medicine, Division of Respiriology, Neurology and Rheumatology, Kurume University School of Medicine, Japan

ICW-B5-2 MicroRNA-34a exacerbates murine collagen-induced arthritis via extensive T lymphocyte activation

Qiujie Dang

Department of Rheumatology and immunology, The Second Affiliated Hospital of Harbin Medical University, Harbin, China

ICW-B5-3 Increased circulating CD14^{bright}CD16⁺ intermediate monocytes are regulated by TNF- α and IL-6 axis in patients with rheumatoid arthritis

Masako Tsukamoto

Division of Rheumatology, Department of Internal Medicine, Keio University School of Medicine, Tokyo, Japan

ICW-B5-4 Distribution of peripheral blood Th22 cells and its relevance to the pathogenesis in rheumatoid arthritis

Yusuke Miyazaki

The First Department of Internal Medicine, University of Occupational and Environmental Health, Kitakyusyu-City, Japan

ICW-B5-5 Evaluation of pathophysiology of rheumatoid arthritis by T cell repertoire analysis using next generation sequencing

Keiichi Sakurai

Department of Allergy and Rheumatology, Graduate School of Medicine, The University of Tokyo, Japan

ICW-B5-6 CXCL13-producing CD4⁺ T cells induced by TGF- β is similar to that in RA synovium

Shio Koabayashi

Center for Innovation in Immunoregulative Technology and Therapeutics, Kyoto University Graduate School of Medicine, Kyoto, Japan
