

International Concurrent Workshop Basic 6

Other autoimmune diseases

Day 3 April 23, 9:25 - 10:35 Room 5

Chair: Shingo Nakayamada

The First Department of Internal Medicine, University of Occupational and Environmental Health, Japan

ICW-B6-1 Association of Killer Cell Immunoglobulinlike Receptor Genes in Iranian Patients with Behçet's disease

Mahdi Mahmoudi

Rheumatology Research Center, Tehran University of Medical Sciences, Iran

ICW-B6-2 DNA microarray analysis of labial salivary glands in patients with Sjögren's syndrome: comparison with IgG4-related disease

Hiroyuki Takahashi

Department of Internal Medicine, Faculty of Medicine, University of Tsukuba, Japan

ICW-B6-3 Mast cells contribute to muscle regeneration, more than inflammation in the C-protein induced myositis model

Kichul Shin

Division of Rheumatology, Seoul Metropolitan Government - Seoul National University Boramae Medical Center, Korea

ICW-B6-4 Follicular Helper Type 2 T Cells are Highly Activated and Associated with Disease Activity in IgG4-related Disease

Mitsuhiro Akiyama

Division of Rheumatology, Department of Internal Medicine, Keio University School of Medicine, Tokyo, Japan

ICW-B6-5 A20/TNFAIP3 gene mutation reinforces inflammation and causes autosomal dominant Behçet's disease

Kazunaga Agematsu

Department of Infection and Host Defense, Shinshu University, Matsumoto, Japan

ICW-B6-6 Knock Out of Endothelin Type B Receptor Signaling Attenuate Bleomycin-induced Skin Sclerosis in Mice

Kengo Akashi

Department of Rheumatology and Clinical Immunology, Kobe University Graduate School of Medicine, Kobe, Japan

ICW-B6-7 Value of composite assessment of nailfold microvascular changes, phenotype of peripheral lymphocyte and pathology of the skin in systemic sclerosis (SSc)

Satoshi Kubo

The First Department of Internal Medicine, University of Occupational and Environmental Health, Japan
